

COVID-19 Mitigation Plan

April 2022

Purpose

The primary purpose of the COVID-19 Mitigation Plan (C19MP) is to promote the well-being of Alaska Chadux Network (ACN) staff, our contractors, and the communities we serve by preventing the transmission of the disease.

Plans Affected

ACN's COVID-19 Mitigation Plan of January 2022 is canceled and superseded by this plan.

Scope

Coronavirus disease 2019 (COVID-19) is an infectious, contagious, and potentially dangerous disease transmitted either by:

- inhalation of infectious particles/droplets,
- direct contact of the particles/droplets with mucous membranes in the respiratory tract or eyes, or
- touching eyes, nose, or mouth with hands that have the virus on them.

COVID-19 can cause respiratory symptoms like a cold or flu and can harm other parts of the body.

Most people who catch COVID-19 have mild symptoms, but some people become severely ill. Older adults and people who have certain chronic medical conditions are at an increased risk of severe illness from COVID-19.

During the global pandemic outbreak of COVID-19, the US Department of Health and Human Services (HHS) along with the Centers for Disease Control and Prevention (CDC) are the national leaders for overall communication and coordination efforts. They also work closely with the World Health Organization (WHO). Where appropriate, ACN will follow the recommendations of these organizations as well as the Occupational Safety and Health Administration (OSHA), and other applicable federal, state, and local health authorities.

This plan provides a general framework for ACN's preparedness and response to the COVID-19 pandemic, outlining the roles and responsibilities of ACN personnel.

Plan Administrator

The Preparedness Manager has the overall responsibility to manage and administer the C19MP, which will be evaluated from time to time to ensure that it remains applicable and suitable for its intended purposes.

This Plan, and any updates hereto, will be adopted by the President / CEO and distributed to each employee.

Objectives

The primary objectives of the C19MP are to:

- Provide a framework to monitor and manage this health threat.
- Prevent and reduce the likelihood of transmission of COVID-19 and minimize the impact to employees, contract workers, visitors, and residents of the companies and communities where we operate or are deployed during a response, exercise, maintenance hub visit, etc.
- Maintain essential business services and operations and mitigate the business impact.

Discussion

ACN will take proactive steps to protect the workplace from COVID-19. Our goal during this pandemic is to operate effectively and continue to provide all essential services. Equally, ACN will take precautions to keep employees healthy within the workplace, at response sites, and any other venues we attend to meet ACN's mission and objectives.

ACN is committed to providing comprehensive information about the nature and spread of this infectious disease, as well as required steps to be taken in the event of an illness or outbreak within the workforce.

Where appropriate, ACN will follow the recommendations of federal, state, and local health authorities to address considerations related to occupational exposure. We will use CDC, OSHA, and State of Alaska guidance on classifying potential worker exposures to COVID-19. There are several aspects of this pandemic that differentiate it from other contagious illnesses and that require variation in planning and response.

The intention of the C19MP is to provide guidance throughout the outbreak, but nothing in this document precludes ACN from modifying its actions to meet the unique conditions presented. These unique actions and mitigation protocols may be based on one or more of the following:

- The current threat of this disease in the world, region, state, and local area.
- The unique and novel nature of the disease, including the incidence, transmissibility, mutability, morbidity, and mortality of the disease.
- Mandates and orders by federal, state, or local public health or public safety authorities.

Definitions

Close Contact. Someone who was less than 6 feet away from an infected person for a cumulative total of 15 minutes or more over a 24-hour period.

Isolation. A strategy used to separate people with confirmed or suspected COVID-19 from those without COVID-19.

Quarantine. A strategy used to prevent transmission of COVID-19 by keeping people who have been in close contact with someone with COVID apart from others.

Probable COVID-19 Case. A person meeting clinical and epidemiologic evidence of COVID-19 but without confirmatory laboratory evidence.

Confirmed COVID-19 Case. When a COVID-19 case is confirmed with the use of a test. Without testing an accurate diagnosis cannot be made.

Physical or Social Distancing. Keeping space between yourself and other people outside of your home.

Symptoms. COVID-19 Symptoms as defined by the CDC)

Action

As set forth below, ACN has instituted various processes, including mask wearing, housekeeping, social distancing, and other best practices to mitigate COVID-19. Employees are expected to promptly report to their managers or supervisors if they are experiencing symptoms of COVID-19. If you have a specific question about this plan, please ask your supervisor.

Additional information and preventive measures can be found at the following websites:

- CDC: <https://www.cdc.gov/coronavirus/2019-nCoV/index.html>
- OSHA: <https://www.osha.gov/coronavirus>
- State of Alaska: <https://covid19.alaska.gov>

Basic Infection Prevention Measures

The best strategies to reduce the transmission of COVID-19 in the workplace are to:

- Wear a proper-fitting mask (when appropriate) that covers mouth and nose while indoors around other people,
- Physically distance from other people at least 6-ft whenever possible,
- Avoid touching your eyes, nose, or mouth,
- Frequent hand washing with warm, soapy water for at least 20 seconds,
- Regularly sanitize frequently touched surfaces.

The degree to which the above strategies should be employed depends on the current transmission rate in the area and will be detailed later in this document.

Worker Protection

Workplace flexibility and protections will be emphasized to protect our employees during this outbreak that may include, but not be limited to the following:

- Employees with COVID-19 symptoms must stay home and quarantine or isolate.
- Deliver services remotely (e.g., phone, video, or web).
- Initiate practices to increase the physical distance between employees and others.
 - Implement flexible worksites (e.g., telework).
 - Implement flexible work hours (e.g., staggered shifts).
 - Increase physical space between employees, contractors, and customers at the worksite.
 - Implement flexible meeting and travel options (e.g., postpone non-essential meetings or events).

Field Work

While on a Response or Project, Alaska Chadu Network employees will, in addition to following guidance in this plan, adhere to the COVID-19 requirements of ACN subscribers and/or community guidelines. These guidelines will be identified and defined in the Site Safety Plan.

Methods to Respond if Exposure Incidents Occur

If an employee exhibits symptoms, tests positive, or has close contact with a person that has COVID-19, the employee should follow the guidelines from the CDC and contact a health care provider.

Employees of ACN shall notify their supervisor as soon as possible if they exhibit symptoms, test positive for COVID-19, or are identified as a close contact.

An employee with symptoms with a negative COVID-19 test should consult with their supervisor and/or their health care provider prior to returning to the workplace.

Contacting Tracing and Recordkeeping

ACN will perform contact tracing to identify any employees, contractors, or visitors that may have had close contact with the confirmed-positive employee in the prior two days while in the workplace.

A HIPAA compliant log will be kept of potential exposures, positive cases, test results, and return to work information.

Guests and Visitors to an ACN Facility

If ACN is advised that a visitor, guest, and contractor has tested positive within five days of visiting an ACN facility, ACN will conduct contact tracing and notification as appropriate.

Returning to Work After Testing Positive or Having a Close Contact

In order to return to work in an ACN facility, the employee's supervisor and the HSE Lead will review current guidelines and determine when the employee may return to work. This may include providing documentation of a negative COVID-19 test.

Vaccination

Various vaccines for COVID-19 are available and are safe per CDC, FDA, state, and local officials.

Vaccination and vaccination boosters are strongly recommended to protect the health of the employee, their family, coworkers, and the community in which they live and work. The COVID-19 vaccine is voluntary for ACN employees; however, this may change as the pandemic progresses. Anyone choosing to not receive the vaccine may be prohibited to mobilize outside of the office/warehouse to participate in a response, training, maintenance task, or exercise at the discretion of ACN, the subscriber company, or the local community.

Vaccinated staff are requested to provide a copy of their COVID-19 vaccination card to the HSE Lead for our records, including an updated copy of their card if they receive a booster vaccination. Some operations may only be allowed to those employees who have provided proof of their COVID-19 vaccination.

Communication

Infectious disease outbreaks can evolve rapidly. ACN will communicate to the staff as information becomes available on the following topics:

- Information about the infectious disease outbreak throughout ACN's area of operations.
- Proposed or anticipated changes to ACN's business operations.
- What mitigation protocols the company is currently following and any modifications or additions to the protocols.
- Notifying employees if a person in the facility has been confirmed COVID-19 positive or has been exposed to someone who has been confirmed COVID-19 positive.

Confidentiality of Medical Information

ACN treats any personal medical information as a confidential medical record in accordance with HIPAA laws.

When required, the number of persons who will be informed of an employee's condition that tested positive to COVID 19 will be kept at the minimum needed not only to comply with legally required reporting, but also to assure proper care of the employee and to detect situations where the potential for transmission may increase.

ACN will observe HIPAA laws to protect the privacy of any employees who come into contact with an infectious disease when conducting staff notifications, contact tracing, and any other communications both internally and externally.

Requests for Medical Information and/or Documentation

If an employee is out sick or shows symptoms of being ill while ACN has activated the C19MP, it may become necessary to request information to determine if a health risk exists for the organization. In general, ACN would request medical information to confirm the need to be absent from scheduled duties, to show whether and how an absence relates to COVID-19, and to know that it is appropriate for the employee to return to work.

COVID-19 Mitigation Protocols

The HSE Lead will monitor the Alaska COVID Summary Dashboard (<https://covid19.alaska.gov/>) and guidance from the CDC, OSHA, State of Alaska, and local municipality in providing a weekly recommendation to the President/CEO on what mitigation protocols ACN should enact to safeguard the health of our staff, contractors, clients, and the general public. The below listed protocols are examples of some of the protocols that may be enacted.

- A. Staff may work from home per ACN policies and with the approval of their supervisor.
- B. Unvaccinated staff that work in an ACN facility must complete a daily self-monitoring log (see Appendix B).
- C. In-person meetings should be minimized. Use virtual meeting platforms as much as possible to conduct business.

- D. Visitors to ACN facilities are discouraged, however any necessary visitors to ACN facilities must complete the Visitor COVID-19 Screening Questionnaire (Appendix A) prior to entry. Based on the answers, a mask may be required. The HSE Specialist will manage the questionnaire.
- E. Sanitize frequently touched surfaces daily.
- F. Mask Requirement: All employees, vaccinated and unvaccinated, must wear a proper-fitting mask at all times in indoor spaces unless working alone at your workstation or work area.
- G. Physical Distancing: Staff should maintain a physical distance from other personnel of at least 6-ft whenever possible.
- H. All non-essential travel will be avoided. Employees who travel as an essential part of their job should consult with management on appropriate actions.
- I. Staff may be split into groups with different office schedules to limit exposure of the staff.

ALASKA CHADUX NETWORK VISITOR COVID-19 SCREENING QUESTIONNAIRE

The health of our employees is our overriding priority. As the COVID-19 pandemic continues, we are monitoring the situation closely and following the guidance from the Centers for Disease Control and Prevention and local health authorities. To prevent the spread of COVID-19 and reduce the risk of exposure to our workforce, we are asking all visitors to complete this questionnaire, maintain social distancing and wear a properly fitted mask while inside our office or work locations. **Please respond to each of the following questions to the best of your ability.** Your participation is important to help us take precautionary measures to protect you and our employees.

1	<p>Are you currently experiencing, or have you experienced in the past 14 days, any of the following symptoms?</p> <p>Cough Yes <input type="checkbox"/> No <input type="checkbox"/></p> <p>Shortness of breath or difficulty breathing Yes <input type="checkbox"/> No <input type="checkbox"/></p> <p>Sore throat Yes <input type="checkbox"/> No <input type="checkbox"/></p> <p>New loss of taste or smell Yes <input type="checkbox"/> No <input type="checkbox"/></p> <p>Fever or Chills Yes <input type="checkbox"/> No <input type="checkbox"/></p> <p>Head or muscle aches Yes <input type="checkbox"/> No <input type="checkbox"/></p> <p>Nausea, diarrhea, vomiting Yes <input type="checkbox"/> No <input type="checkbox"/></p>
2	<p>In the past 14 days, have you been in close contact (within 6-ft for more than 15-min over a 24-hr period) to anyone who was experiencing any of the above symptoms or has experienced any of the above symptoms since your close contact?</p> <p>Yes <input type="checkbox"/> No <input type="checkbox"/></p>
3	<p>In the past 14 days, have you been in close contact (within 6-ft for more than 15-min over a 24-hr period) to anyone who has tested positive for COVID-19?</p> <p>Yes <input type="checkbox"/> No <input type="checkbox"/></p>
4	<p>Have you been tested for COVID-19 and are waiting to receive test results?</p> <p>Yes <input type="checkbox"/> No <input type="checkbox"/></p>
5	<p>Have you tested positive for COVID-19 in the past 5 days, or are you presumptively positive for COVID-19 based on your healthcare provider's assessment or your symptoms?</p> <p>Yes <input type="checkbox"/> No <input type="checkbox"/></p>
6	<p>Is there any reason why you feel you are at higher risk of contracting COVID-19? If "yes", please provide a brief explanation.</p> <p>Yes <input type="checkbox"/> No <input type="checkbox"/></p>

I hereby certify that the responses provided above are true and accurate to the best of my knowledge.

Health Guidance:

- Take your temperature with a thermometer twice a day.
- Monitor for COVID-19 symptoms: fever or chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea.
- Wear a properly fitted mask inside public spaces.
- Physically distance from people in public spaces (at least 6-ft).
- Limit your activities in public or with persons outside your immediate family.
- Practice preventive measures – frequent handwashing, regular sanitize frequently touched surfaces, and avoiding contact with individuals who may be ill.
- Inform your supervisor immediately if your condition changes.
