General Information

- ACN is the only vessel coverage provider that offers Federal coverage for the entire Western Alaska (WAK) and Prince William Sound (PWS) Captain of the Port Zones (COPTZ) and State of Alaska coverage throughout Regions 2-10, including: Prince William Sound, Cook Inlet, Kodiak Island, Aleutians, Bristol Bay, Western Alaska, Northwest Arctic, North Slope, and the Interior!
- Experience Counts – We have been dedicated to oil spill compliance, incident planning, and response since 1993.
- Unmatched Capabilities – We have pre-packaged equipment staged in 17 strategic locations throughout Alaska ready to respond to any incident.
- The Alaska Chadu Network Certificate of Coverage remains continuously valid for guaranteed compliance and conforms to the P&I Club standards. Our comprehensive coverage area allows vessel operators the most flexibility and freedom to maneuver.
- Your company will have the ease of mind that your vessels' compliance in Alaska is proven, comprehensive, and fully vetted through various agencies and stakeholders.
- Payment is due upon receipt of invoice and payable in U.S. dollars per terms of your category nomination. There is no prorating of services or invoiced coverage amount.
- Alaska Chadu Network Members will receive preferred response rates!

Key Definitions

Nontank Vessel (NTV): A self-propelled vessel that does not carry oil or fuel in bulk as cargo under state or federal regulations.

- Operating: A vessel stopping to conduct any cargo operation or commercial activity within State of Alaska waters (excluding Southeast Alaska). Operating vessels over 400 GRT require State compliance.
- Transit Only: A vessel passing through the WAK and/or PWS COTPZ without stopping to conduct any operation or commercial activity in the WAK and/or PWS COTPZ and is sailing to or from a U.S. port. Transiting vessels greater than 400 GRT or 400 ITC, whichever is greater, require Federal compliance.

Tank Vessel (TV): A self-propelled vessel that carries oil and/or refined products in bulk as cargo that operates in state or federal waters, or both, that requires oil spill compliance.

- Operating: A vessel stopping to conduct any cargo operation or commercial activity within the WAK COTPZ (outside of Cook Inlet), whether inside or outside State of Alaska waters.
- Transit Only: A vessel passing through the WAK COTPZ without stopping to conduct any operation or commercial activity within the WAK COTPZ and is sailing to or from a U.S. port. Tankers that transit WAK COTPZ that are calling ports in Cook Inlet only are considered Transit-Only vessels. A vessel passing through the PWS COTPZ, more than 50 nautical miles offshore, without stopping to conduct any operation or commercial activity within the PWS COTPZ and is sailing to or from a U.S. port.

Tank Barge: A vessel that is not self-propelled that carries oil or refined oil in bulk as cargo and requires state and/or federal oil spill compliance.

Total Oil Capacity: The total maximum amount of oil or refined products that can be stored in either fuel tanks or cargo tanks in a Vessel – commonly referred to as Worst Case Discharge (WCD). The Capacity is reported for each vessel seeking oil spill compliance coverage.

ITC: International Tonnage Certificate, means the gross tonnage measurement of the vessel under the Convention Measurement System.

GRT: Gross Register Tonnage, means the gross tonnage measurement of the vessel under the Regulatory Measurement System.
