

# Barrier dam

Application	Specifications
<p>The barrier dam is deployed in streams or ditches to create a barrier to water or fuel flow. Once water has built up behind the barrier, fuel can be skimmed off the surface. Chadux currently uses 10 meter barrier dams that can hold back 2 feet of fluid.</p>	<p><b>Weight (lbs)</b> 81</p>

Operational parameters	Support equipment	Additional information
<p>Barrier dam may be paired with piping and valves to create an underflow dam.</p>
